

Full time job (m/w/d)

Full-stack Developer

Who we are

We are an emerging startup from Hamburg with the vision of developing the best software for data management and quality assurance in the industrial 3D Printing sector (B2B). We believe that 3D Printing is the most resource-efficient way to produce products and want to support the growth of the industry with our company. We are a young and enthusiastic team that emphasizes a good working culture.

What you will do

- Implementation of front-end logic using Angular and Typescript
- Programming microservices using Python and C#
- Creating interfaces to devices and third-party services

What is in for you?

- Interesting job with a lot of growth opportunity
- Flexible working hours and remote work
- Opportunity to make a tangible impact on our company's trajectory

What we are looking for

We are seeking an independent yet team-oriented individual with a solid 2-3 years of experience. The ideal candidate should possess the ability to work autonomously while also valuing open communication and collaboration with our other developers. Fluent proficiency in both German and English is desirable. A particular interest in 3D printing would be advantageous, as at amsight GmbH, we aim to make additive manufacturing more sustainable and contribute to the advancement of the industry.

How to apply

Interested in being part of our journey? Just write us a short mail or connect with me on LinkedIn (contact details provided in the footer). Let us know why you would like to work with us – but please, keep it short.
